

CSS Navigation Bar

Demo: Navigation Bars

Navigation Bar = List of Links

A navigation bar needs standard HTML as a base.

In our examples we will build the navigation bar from a standard HTML list.

A navigation bar is basically a list of links, so using the `` and `` elements makes perfect sense:

```
<ul>
  <li><a href="default.asp">Home</a></li>
  <li><a href="news.asp">News</a></li>
  <li><a href="contact.asp">Contact</a></li>
  <li><a href="about.asp">About</a></li>
</ul>
```

Example 1

```
<!DOCTYPE html>
<html>

<body>

  <ul>
    <li><a href="#home">Home</a></li>
    <li><a href="#news">News</a></li>
    <li><a href="#contact">Contact</a></li>
    <li><a href="#about">About</a></li>
  </ul>

  <p>Note: We use href="#" for test links. In a real web site this would
  be URLs.</p>
```

```
</body>
```

```
</html>
```

Result

- [Home](#)
- [News](#)
- [Contact](#)
- [About](#)

Note: We use href="#" for test links. In a real web site this would be URLs.

CSS Vertical Navigation Bar

```
ul {
  list-style-type: none;
  margin: 0;
  padding: 0;
  width: 200px;
  background-color: #f1f1f1;
}

li a {
  display: block;
  color: #000;
  padding: 8px 16px;
  text-decoration: none;
}

/* Change the link color on hover */
li a:hover {
  background-color: #555;
  color: white;
}
```

Example 2

```
<!DOCTYPE html>
<html>

<head>
  <style>
    ul {
      list-style-type: none;
```

```
        margin: 0;
        padding: 0;
        width: 200px;
        background-color: #f1f1f1;
    }

    li a {
        display: block;
        color: #000;
        padding: 8px 16px;
        text-decoration: none;
    }
    /* Change the link color on hover */

    li a:hover {
        background-color: #555;
        color: white;
    }
</style>
</head>

<body>

    <h2>Vertical Navigation Bar</h2>

    <ul>
        <li><a href="#home">Home</a></li>
        <li><a href="#news">News</a></li>
        <li><a href="#contact">Contact</a></li>
        <li><a href="#about">About</a></li>
    </ul>

</body>

</html>
```

Result

Vertical Navigation Bar

CSS Horizontal Navigation Bar

```
li {  
  display: inline;  
}
```

Example 3

```
<!DOCTYPE html>  
<html>  
  
<head>  
  <style>  
    ul {  
      list-style-type: none;  
      margin: 0;  
      padding: 0;  
    }  
  
    li {  
      display: inline;  
    }  
  </style>  
</head>  
  
<body>  
  
  <ul>  
    <li><a href="#home">Home</a></li>  
    <li><a href="#news">News</a></li>  
    <li><a href="#contact">Contact</a></li>  
    <li><a href="#about">About</a></li>  
  </ul>  
  
</body>  
  
</html>
```

Result

[Home](#) [News](#) [Contact](#) [About](#)

Horizontal Navigation Bar Examples

Create a basic horizontal navigation bar with a dark background color and change the background color of the links when the user moves the mouse over them:

```
ul {
  list-style-type: none;
  margin: 0;
  padding: 0;
  overflow: hidden;
  background-color: #333;
}

li {
  float: left;
}

li a {
  display: block;
  color: white;
  text-align: center;
  padding: 14px 16px;
  text-decoration: none;
}

/* Change the link color to #111 (black) on hover */
li a:hover {
  background-color: #111;
}
```

Example 4

```
<!DOCTYPE html>
<html>

<head>
  <style>
    ul {
      list-style-type: none;
      margin: 0;
      padding: 0;
      overflow: hidden;
      background-color: #333;
    }

    li {
      float: left;
    }

    li a {
      display: block;
      color: white;
```

```
        text-align: center;
        padding: 14px 16px;
        text-decoration: none;
    }

    li a:hover {
        background-color: #111;
    }
</style>
</head>

<body>

    <ul>
        <li><a class="active" href="#home">Home</a></li>
        <li><a href="#news">News</a></li>
        <li><a href="#contact">Contact</a></li>
        <li><a href="#about">About</a></li>
    </ul>

</body>

</html>
```
